with high non-structural
carbs that
turn to sugar
when metabolized

No Soy

No Hydrogenated
Fats or Oils

No
Chemical Preservatives

No Flax By-Products
like Flax Meal

No Wheat Middlings

It Just Doesn't Get Any Better

Omega 3s are absolutely essential to your horse in so many ways. They fight inflammation, they support and build the immune system, improve bone and joint health, restore cracked and brittle hooves and support strong solid hoof growth, they can eliminate sweet itch and bug-bite sores, are recommended for horses with insulin resistance and Cushings, and can reduce symptoms of metabolic syndrome, all while promoting shiny, healthy coats and smoother skin texture. All that with an unbelievably low NSC rating of 4.4. Compare labels. You will find no other brand using 99.9% pure Non-GMO flax. That's .9% higher than required for human-food-grade. Many don't even use pure flax, opting for a less expensive and less effective flax by-product like flax meal. From Omega Fields, the folks who actually care about the health and happiness of your horse.

Available in a 4.5 lb pouch, 20 lb and 50 lb bags

Joe Camp, author of the National Bestseller *The Soul of a Horse - Life Lessons from the Herd*, says, "This is the very best Omega 3 supplement out there as far as I'm concerned because it's the *only* one that uses 99.9% pure Non-GMO stabilized fortified flax. I wouldn't feed my horses something I couldn't eat myself."
